

Welcome to St. Mary's Episcopal School. Our students begin their educational journey in preschool and continue through the eighth grade.

One of the best things about living in the Oklahoma City Metro area is that there are so many wonderful private schools that provide an excellent education for your son or daughter. This makes the job of selecting the "right" school a challenge, as each school has its own distinct culture.

Schedule a visit and experience the reality of The St. Mary's Way. I invite you to watch our students and engage with them as they go about the important work of growing up to become thoughtful, capable and responsible future leaders. Listen to them as they look you in the eye and tell you what they are learning. Marvel as master teachers bring out the full human potential in the students they both know and love. And realize that our carefully designed program prepares students to thrive in a changing, increasingly complex world. Know that St. Mary's is a place where great Christian and educational lives begin.

I trust you will have this type of experience, like I do whenever I walk the halls of our school. Let the untold stories of your child be told.

Sincerely,

Pamela Dockter

Head of School
